

The aspect of "quality and environmental sustainability" is a topic of substantial importance in order to achieve an increasingly eco-sustainable development of the company's production activity and to ensure a continuous improvement in the quality of life for future generations.

Imprima Industrial S.r.l. is aware that an ecological and eco-sustainable orientation of its business, as well as the achievement of objectives for improving its environmental performance, leads not only to a better level of business, but above all to the creation of long-lasting values.

The Management is committed to adopting an Environmental Management System, compliant with the UNI EN ISO 14001: 2015 standard, which guarantees the prevention of pollution and meets the requirements of customers and relevant interested parties, within its operating context. This is pursued by seeking to continuously improve its environmental performance and customer expectations in terms of sustainability.

This commitment is aimed in particular at:

- Operate in its own reference context for the identification and mitigation of risks related to the activity as well as the identification and approval of any environmental opportunities;
- Apply the logic of risk management in the exercise of processes, engaging in environmental protection and pollution prevention;
- Operate in full compliance with the applicable legal requirements and other provisions in force regarding environmental protection by ensuring all compliance obligations inherent to the company and its business;
- Define, pursue and periodically review objectives aimed at further reducing the various environmental impacts (***emissions into the atmosphere, waste production, water consumption, energy use***) and in general the prevention of pollution;
- Work for the continuous improvement of environmental efficiency, with the aim of eliminating or containing the consequences of any environmental risk factors and the environmental impacts associated with the exercise of company activities;
- Check the efficiency of environmental management, including through audits, to be carried out periodically, taking into account the context and requests from interested parties;
- Adopt technological and management measures to prevent and respond to emergencies;
- Spreading, within the company, the culture of Environmental Protection through information, training and staff training in compliance with operational and behavioral rules, designed to improve the environmental management of Imprima Industrial S.r.l.;
- Maintain clear communications with the public (customers, suppliers, public bodies, ...) to consolidate and improve the trust gained so far and transmit the company's commitment in the environmental field.

Imprima Industrial S.r.l. it also undertakes to review its Environmental Policy during the Management Review.
